(CLEAN VERSION)

**SUBSTITUTE SPECIFICATION:**

TITLE:

10 FOOD AND DRINK MANAGING DEVICE IN CIRCULATION TYPE CARRYING PATH

BACKGROUND OF THE INVENTION

[0001] (1) Field of the Invention:

15 [0002] Present invention relates to a food and drink managing device that manages foods and drinks with a circulation type carrying path that conveys foods and drinks.

[0003] (2) Related art statement:

20 [0004] Heretofore, the circulation carrying type dining counter is widely used, which has the endless circulation type carrying path for conveying foods and drinks along the dining table, such as counter, and conveys the containers, such as the plates with foods and drinks, for example Sushi, on this carrying path, because it enables customer to eat and drink without moving, or cook to prepare foods without moving, and also enables customer to choose and eat the food and drink that they want while sitting.

25 [0005] In the circulation carrying type dining counter as aforesaid, the number and variety of food and drink on the carrying path may decrease because the customer chooses the food and drink conveyed on the carrying path by their favor. Therefore, it is sometimes difficult to supply sufficient services.
